## Aurea, the intelligent investment: a solution designed to render your time more valuable.

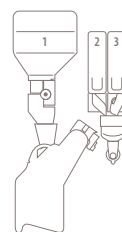

Aurea's technology is the guarantee you need for your investment. It is durable and will help you to have more time! The automated cleaning system, the ability to programme the machine via computer and the autodiagnosis system to detect malfunctions and errors not only render the management and the maintenance of the machine easier and faster, but also guarantee high standards of performance over time. And with the locking system available as standard, even security is no longer optional.

# AUREA

## Technology and style for a quality experience.

Aurea expresses the essence of quality, providing a pleasant and immediate user experience characterised by technology, design and taste.

### Italian design

Harmonious lines in a compact and minimalist design, LED lighting as an aesthetic trait of the machine; elements of style that represent elegance in its purest form.

### Touch screen

In the touch-screen version, the machine communicates with the user in a simple and direct manner, involving them with the immediateness of video.

### Chocolate built-in

Chocolate and much more: true pleasure is being able to try a new flavour every time. With two canisters for soluble products, Aurea's menu is even richer and more inviting.

### Coffee cream LED

A lighting system designed to accompany the user in discovering their next coffee, with all the excitement of following the process right up to delivery.

AUREA TOUCH

## The fully automatic machine that helps you to develop your business.

Capture attention with multimedia content, tantalise the palate by offering more choice: Aurea accompanies you in your business and helps you in making it grow.

You can display promotional messages via the integrated video player and offer a personalised menu with a wide range of different coffee-based drinks, the opportunity to add fresh milk and soluble products for an even richer selection.
